

I-CAGE

**CREATE THE OPTIMAL
ENVIRONMENT FOR EGG
PRODUCTION**

SMART SPACE. SMARTER FARMING.

The new I-CAGE™ redefines modern poultry housing, carefully built by our R&D centre to fit your operation perfectly.

Every part works together to give you more space, better comfort for your birds, greater consistency, and a maximum return on investment. Layout? Airflow? Feed distribution? We got you covered there too. All designed with you in mind.

Every detail matters. The customisable modular design ensures you make the most of your space, while premium 100% Italian materials ensure strength, hygiene and lasting performance. Healthy hens, happy flocks and a system that keeps performing, day after day.

And because we're always innovating, I-CAGE™ grows with your farm, ready for changing regulations, market demands and other future challenges.

DESIGNED FOR PERFORMANCE

Unique Engineering for Proven Results

MODULAR BY DESIGN

Flexible sections fit local space requirements, make the best use of every centimeter, reduce waste, and the right balance between density and welfare. The system is fully configurable and the right fit for any farm.

RELIABLE PRODUCTION

Optimised layout keeps your birds healthy and reduces egg breakage for steady daily output, and high profitability and performance.

MATERIALS THAT ENDURE

Carefully selected, high-grade European raw materials ensure strength, hygiene and long service life.

READY FOR WHAT'S NEXT

Our continuous R&D keeps your system compliant with changing regulations and market demands.

TAILORED TO YOUR FARM

Cage length, layout, and fittings can be adjusted to suit any operation — from small farms to large facilities.
